

Why Netenrich?

We're experts in security and digital operations at scale. Netenrich boosts the effectiveness of organizations' security and digital operations so they can avoid disruption and manage risk. Over 3,000 customers and managed service providers rely on our Resolution Intelligence Cloud™ to deliver secure operations at scale.

All digital operations should be secure, especially those that keep the business in business. No organization is immune to cyber threats, and many organizations and service providers face significant challenges running all digital operations securely at scale. Most organizations are challenged by the combination of increasing operational complexity *and* increasingly frequent and sophisticated security threats.

Resolution Intelligence Cloud: More data and more intelligence for highly automated secure operations

Resolution Intelligence Cloud, a native-cloud data analytics platform, transforms security and operations data into intelligence that organizations can act on fast before critical issues occur. Resolution Intelligence Cloud is a new way to manage security and digital ops with the scale and speed of Google Chronicle built in.

- **Observe everything** from a common operational view across security, IT, cloud. Ingest all your data without penalty and enjoy sub-second search with hot data for a year.
- **Detect what matters** to the business. Improve threat detection and response while also improving availability and performance. Reduce fatiguing alert noise and wasted time.
- **Understand** what's happening and what situations need immediate attention. Know where to focus aligned with the business and up-level staff.
- **Act fast with context**, proactively, and automate as much as possible.

Jumpstart Google Chronicle and accelerate time to value

Resolution Intelligence Cloud harnesses and operationalizes Chronicle. Chronicle is a powerful engine with super-fast search of security telemetry at petabyte scale from virtually any source. Resolution Intelligence Cloud makes Chronicle easy to use, while Netenrich setup and support services ensure you're up to speed fast. Resolution Intelligence Cloud enables your security team to do even more: strengthen your security posture, respond faster and proactively, and up-level everyone on your security team to be more effective.

Netenrich quick facts

Decade+ experience managing digital ops and security
3000+ partners and customers globally

Global presence

800+ employees

Headquarters: San Jose, CA

Offices: Dallas, TX; Bangalore & Hyderabad, India

Partner dedication

World-class technology and partner support

Global secure operations
