

SECURITY OPERATIONS, REIMAGINED
CLOUD ENVIRONMENTS MOVE FAST — THREATS MOVE FASTER

Security Operations for the Cloud Era

Netenrich shifts the focus from efficiency to efficacy delivering measurable outcomes with Agentic AI that bridges the gap between risk and operations. Security that doesn't just detect. It resolves— autonomously, continuously, and at cloud speed.

ENGINEERED DIFFERENTLY — THE SHIFT

Tool sprawl → One unified entity model

Alert-by-alert triage → Situation-based grouping

Manual response → Actionable playbooks

Severity prioritization → Real business-impact risk

PROVEN SECURITY OUTCOMES ACROSS ENTERPRISE OPERATIONS

50%+

Cost Reduction

Dramatically lower operational costs through autonomous triage and response.

30x

Detection Coverage

Exponentially broader threat detection compared to legacy SOC approaches.

98%

L1/L2 Work Reduction

Near-complete elimination of manual triage — with 99% accuracy.

HOW IT WORKS

Ingest. Correlate. Resolve.

A three-layer model that continuously converts raw security data into **risk-prioritized, actionable outcomes** — turning telemetry into grounded security decisions at machine speed.

PLATFORM ARCHITECTURE

Built on the full Google Security stack

A glass box, not a black box.

Every action is **documented, auditable, and tied to measurable risk reduction** — full transparency into every agent decision, correlation, and response taken.

WHAT OPERATIONAL SECURITY LOOKS LIKE

From posture to response to **executive risk visibility**

Netenrich covers the full spectrum of modern cloud security—without displacing what’s already working in your environment.

01

Cloud Posture Operations

- Integrate cloud findings into **unified entity context**
- Prioritize by **business criticality**, not just severity
- Build & execute a structured remediation roadmap
- Config hardening & control validation
- Monthly posture reviews with progress reporting

02

Unified Posture & Response

- Extend posture beyond cloud — **identity, SaaS, CI/CD, DSPM**
- Correlate detections across cloud, endpoint & app layers
- Unified entity model across all surfaces
- Single consolidated view of posture, signals & incidents

03

Advanced Risk Operations

- Customer-specific **Risk Register** from posture & signals
- FAIR-CAM control efficiency & residual risk scoring
- **Top Risks That Matter:** impact, likelihood, confidence
- Executive dashboards & quarterly CISO risk briefings

PROVEN AT ENTERPRISE SCALE

//

We moved from managing alerts to managing risk. We now operate with far greater confidence and precision.

Kumar Palaniappan
CISO · CLOUD SOFTWARE GROUP (CITRIX, TIBCO)

//

They provided the data-driven execution and practical solutions required to strengthen our security posture.

Harsh Jha
CTO · NUVAMA GROUP
