NETENRICH

Resolution Intelligence:
## Accelerate your business with resilient, scalable operations

Monitoring is important. Detection is important. Resolution is critical. You've invested in monitoring and detection to tell you when something goes wrong. Your IT and security teams are flooded with notifications and alerts, so it's challenging to know what you need to do and when. Netenrich Resolution Intelligence bridges the costly gap between detection, response, and your ultimate goal: resolution. With Netenrich, operational and security issues are resolved before they disrupt your business.

Our approach brings IT, security, and cloud operations together in one powerful SaaS platform to drive operational intelligence across your infrastructure, applications, and digital experience. We deliver the outcomes you need — greater agility, stronger security, higher skills retention – and keep IT aligned as the business scales.

Who is Netenrich?

- Founded in 2004
- Headquartered in San Jose, CA
- 1,000+ customers worldwide
- 800+ employees
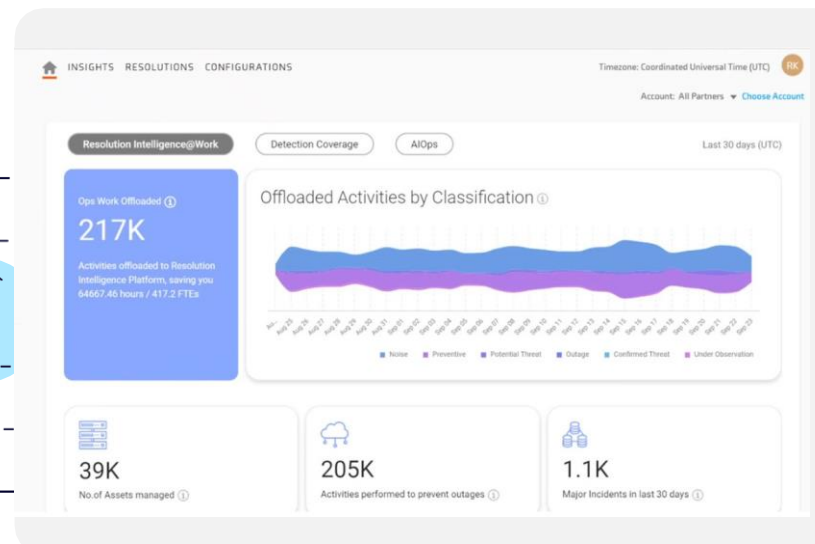

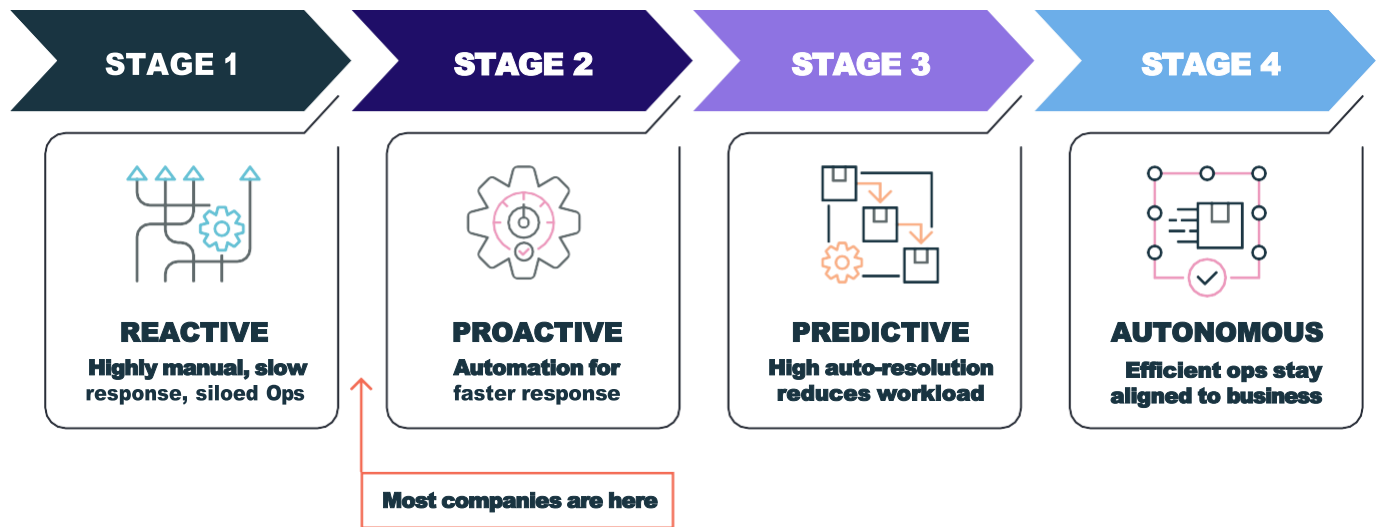

Warp-speed resolution

Netenrich Resolution Intelligence combines AIOps with more than a decade of network and security operations center (NOC and SOC) innovation to drive smarter, faster resolution and analytics that help transform your business operations. Our solutions integrate with your existing security tools and infrastructure and help you pivot to resilient, predictive ops faster with less risk and less effort. Our AI engine continuously evolves using current and historical data points across our installed base to automate noise reduction and resolution. Netenrich Resolution Intelligence:

- **Reduces noise, cost, complexity, and workload**
- **Delivers real-time and "over time" analytics**
- **Automates integration and management to maximize tool value**
- **Consolidates and correlates data to deliver actionable insights**
- **Contextualizes and prioritizes "act-ons" for rapid remediation**

Modern digital ops transformation

100%	24/7 365	95+%	75%	50%
Visibility	**Coverage**	**Noise & Ticket Reduction**	**Faster response times**	**YOY ops workload reduction in 50 days**

Risk-driven security posture

STAGE 1	STAGE 2	STAGE 3	STAGE 4
REACTIVE Highly manual, slow response, siloed Ops	**PROACTIVE** Automation for faster response	**PREDICTIVE** High auto-resolution reduces workload	**AUTONOMOUS** Efficient ops stay aligned to business

Most companies are here

Netenrich aligns intelligent security operations (SecOps) with risk to improve your business resilience and optimize the resources you already have. Resolution Intelligence for cyber-security promotes full cyber situational awareness (CSA) that equips defenders to predict Time to Compromise (TTC) and act to disrupt attacks on your high-value assets first.

We combine internal and external risk management with threat modeling and intelligence, adversary emulation, attack surface management (ASM), managed detection and response (MDR), and analytics to improve your security posture over time.
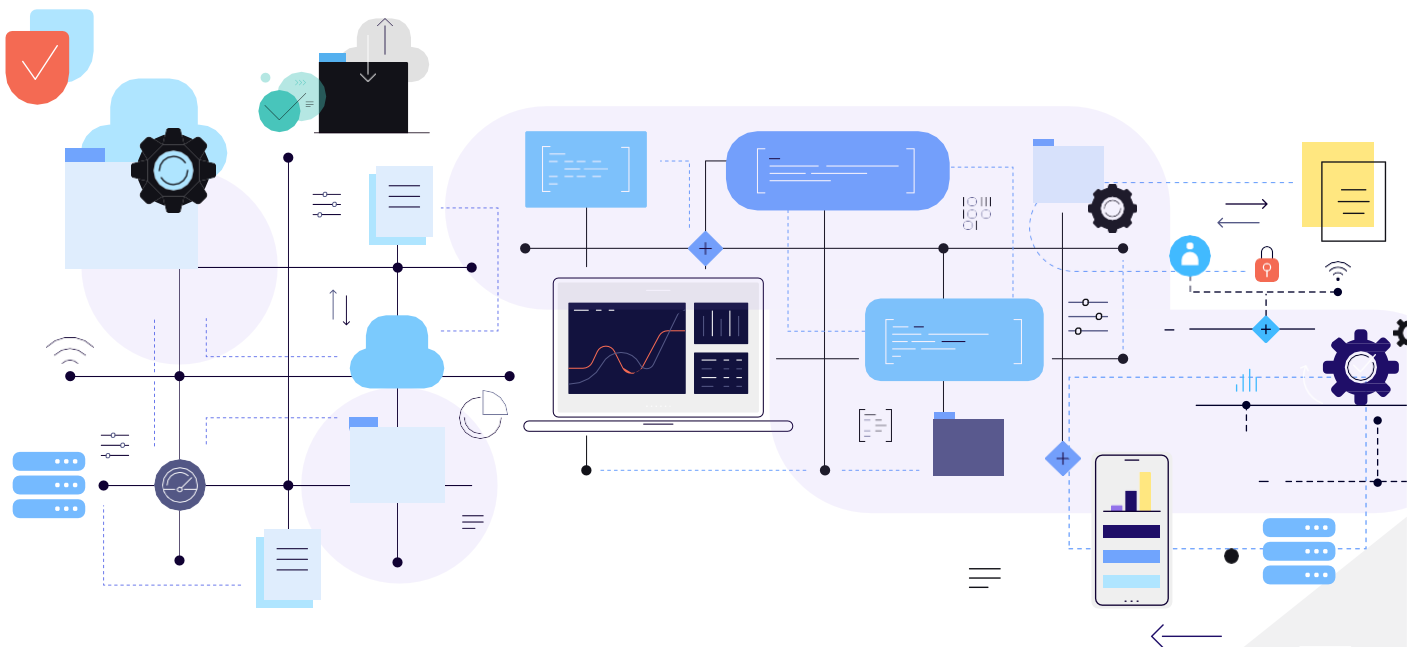

Why Netenrich?

Netenrich is redefining security operations with a proactive, shift-left approach. Our Adaptive MDR solution, powered by Resolution Intelligence Cloud™ technology, leverages artificial intelligence and big data to deliver customized experiences and data-driven results for every customer. With a focus on agility and innovation, our solution evolves with your changing needs, and brings you a step closer to achieving autonomic operations. As a trusted Google partner, specializing in Google SecOps, we've transformed hundreds of companies across various sectors, including healthcare, finance, and technology. From our global hubs, we provide 24/7 proactive uninterrupted operations, peak performance, and peace of mind to 1,000+ enterprise customers. **Contact us** to learn more about what we can do for your business today.
